

**REMARKS**

The specification has been amended to correct the cross-reference to the prior applications.

The cross-reference of the specification has been amended to be consistent with the Filing Receipt mailed November 7, 2003. A corrected Filing Receipt which does not include the information under an asterisk, as found in the Filing Receipt of November 7, 2003, is requested. A separate Request is attached in this regard.

A copy of the Notice to File Missing Parts dated November 11, 2003, is attached. It is the undersigned's belief that the response date for filing the missing fees indicated in the attached Notice is January 7, 2004, and that this date is extendible under the provisions of 37 CFR 1.136(a). Accordingly, the filing fees are not believed to be required at this time.

It is also the undersigned's understanding that the actions described under paragraphs I-III of the attached Notice with regard to Figures 3-5 requires a response by January 7, 2004, and the present comments as well as the comments of the attached Petition are responsive thereto.

Specifically, the attached Notice to File Missing Parts indicates that Figures 3-5 described in the specification were not included with the originally-filed papers. The applicants respectfully submit that the originally-filed application papers include a complete copy of the parent application text which was published as WO 95/07985 (i.e., PCT/GB94/02006). The published parent application (i.e., WO 95/07985) contains 36 pages of a specification along with a 1 page abstract, 23 claims and 7 sheets of drawings. As indicated on the attached copy of the undersigned's Post Card receipt

these 36 pages of the specification, 1 page of an abstract, 23 claims and 7 sheets of drawings were filed and received by the Patent Office on July 18, 2003.

In addition to these 7 sheets of drawings from the originally-filed application (which published as WO 95/07985) the undersigned additionally filed, with a cover "Submission of Formal Drawings", 7 sheets of Formal Drawings. Unfortunately, these 7 sheets of formal drawings were not a complete set of the formal drawings filed in the parent application Serial No. 09/291,038. The 7 sheets of formal drawings filed July 18, 2003 were missing one sheet, which contained Figures 3-5. Figures 3-5 were filed however, as noted above, on July 18, 2003, as a part of the copy of WO 95/07985 filed July 18, 2003. The attached 8 sheets of formal drawings is a complete set of formal drawings.

It is believed that the 7 sheets of formal drawings, which were filed in addition to the originally-filed complete set of 7 sheets of the original application drawings, excluded the Figures 3-5 described in the attached Notice to File Missing Parts. The filing and receipt by the Patent Office of these additional 7 sheets of formal drawings is evidenced by the attached copy of the undersigned's Post Card receipt dated July 18, 2003.

Accordingly, the originally-filed application text, which is the same as the parent application PCT/GB94/02006 (which published as WO 95/07985) contained all the Figures 1-18 on 7 sheets of drawings and the attached Notice to File Missing Parts is believed to have been issued in error.

In addition to the fact that a complete set of drawings was filed and received by the Patent Office on July 18, 2003, the applicants note that the Preliminary Amendment

and the undersigned's filing Cover Sheet of July 18, 2003 both include a statement incorporating the contents of PCT/GB94/02006, by reference. Accordingly, the entire set of figures of the parent PCT application, including Figures 3-5, should be considered as having been filed on July 18, 2003.

Grant of the attached Petition in this regard and return of the undersigned's \$130.00 Petition Fee to Deposit Account No. 14-1140, in the manner described in the attached Notice to File Missing Parts are requested.

The attached 8 sheets of formal drawings are submitted for completeness.

Moreover, the attached Notice to File Missing Parts indicates that the oath or Declaration was not filed and/or that a "properly signed Oath or Declaration in compliance with 37 CFR 1.63, identifying the application by the above application number and filing date is required." See, the attached Notice to File Missing Parts.

The applicants respectfully submit that such a further Declaration identifying the application by the new application Serial No. 10/622,134 and the filing date of July 18, 2003, is not required. In fact, the undersigned's filing of July 18, 2003, included a copy of the Declaration from the parent application and the same was received by the Patent Office on July 18, 2003. A further copy of the Declaration is attached for the convenience of the Office. As noted in the attached copy of the Notice originally published in the OG at 1177 OG 60 (July 13, 1995), a copy of the Declaration from a parent application may be used and there is no requirement to include the new serial number and/or filing date in such cases.

Accordingly, the applicants respectfully submit that, with regard to the attached Notice to File Missing Parts, the applicants filed a complete application, including

WILLIAMS et al.  
Appl. No. 10/622,134  
November 14, 2003

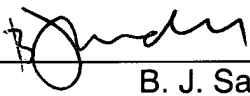

Figures 3-5 mentioned in the attached Notice to File Missing Parts, and a copy of the Declaration from the parent application which should be sufficient.

Grant of the attached Petition and return of the undersigned's \$130.00 Petition fee to Deposit Account No. 14-1140 are requested.

A further response is being considered with regard to payment of the fees indicated as being required in the attached Notice to File Missing Parts by January 7, 2004. Nothing further is believed to be required however at this time in this regard. The Office is requested to advise the undersigned if otherwise.

Respectfully submitted,

**NIXON & VANDERHYE P.C.**
